## FULL STACK SOFTWARE DEVELOPER

Experienced in Ruby on Rails and React.js. Writing music for a band has taught me about healthy collaboration, compromise, and clear separation of responsibility, a skill that works well with a programming team and was tested during group projects while attending Flatiron School in the Software Engineering program.

## LANGUAGES AND TECHNOLOGIES

Skills: Ruby, Javascript, SQL, HTML5, CSS, Rails, React, React-Redux, Semantic-UI, Bulma, Sass/scss

Languages: Spanish(fluent)

## TECHNICAL PROJECTS

### [Pawns](#) - [Github](#) | [Demo](#)

A chess site news feed where users can read and comment on articles, as well as discover chess related news from the NewYork Times.

- Built using React for front end development for easy implementation of components and features.
- Built using Rails for back end development for clear CRUD functionalities.
- Utilized JSON Web Tokens and local Storage to store encrypted user information client-side.
- Utilized react-redux to store data to maintain a single source of truth.
- Structured and designed with Semantic-UI-React for styling and structure.
- Implemented Bcrypt authentication to allow only the user to maintain their data and profile.

### [Flat-Note](#) - [Github](#) | [Demo](#)

A web application where a logged in user can create, edit, and delete notes.

- Built using React for front end development for easy implementation of components and features.
- Built using Rails for back end development for clear CRUD functionalities.
- Utilized react-redux to store note and user data to maintain a single source of truth.
- Structured and designed with Semantic-UI-React for styling and structure.
-
